

# MICAH JOHNSON

Kennedale, TX | (817) 366-8742 | micah@createsomething.io | createsomething.io

System Architect with 12+ years building web platforms, APIs, and AI-augmented workflows. Led modernization of Webflow's Marketplace infrastructure serving 500+ creators and 7,000+ templates. Seeking to apply technical expertise and systems thinking to federal AI and modernization initiatives.

## TECHNICAL SKILLS

<b>Languages:</b> TypeScript, JavaScript, Python, SQL, HTML/CSS	<b>AI/Automation:</b> Claude API, OpenAI API, LLM integration, Agent orchestration
<b>Platforms:</b> Cloudflare (Workers, Pages, D1, KV, R2), Vercel, AWS	<b>Frameworks:</b> SvelteKit, React, Next.js, Node.js
<b>Data:</b> PostgreSQL, SQLite, REST APIs, GraphQL, ETL pipelines	<b>Tools:</b> Git, CI/CD, Airtable, Make/Zapier, Webflow

## PROFESSIONAL EXPERIENCE

System Architect — Webflow

Dec 2024 – Present

Remote

- Architect backend systems for Webflow's App and Template Marketplaces, supporting 300+ app developers and 500+ template creators
- Built AI-augmented form submission system processing 700+ app submissions with automated validation and Airtable integration
- Developed Asset Dashboard for marketplace operations, reducing manual review time through automated QA checks
- Created Webflow Way Validator app to ensure marketplace submissions meet quality standards programmatically
- Implemented cross-origin iframe communication system for embedded applications with dynamic styling inheritance

Marketplace Operations Manager — Webflow

Jul 2023 – Dec 2024

San Francisco Bay Area (Remote)

- Managed quality assurance for Template Marketplace with 7,000+ templates, ensuring consistent standards across submissions
- Built Template Marketplace Dashboard integrating marketplace data into Webflow's CMS for real-time operations tracking
- Conducted QA for app submissions, establishing quality and functionality standards adopted across the organization
- Collaborated with engineering to resolve complex technical issues affecting marketplace creator experience

Co-Founder, Technology — Half Dozen

Jul 2024 – Present

Remote

- Co-founded startup building workflow automation platform (WORKWAY) for compound multi-step automations
- Architected multi-tenant SaaS platform on Cloudflare infrastructure (Workers, D1, R2, KV)
- Designed developer marketplace model enabling third-party workflow creation and monetization

Webflow & API Developer — CREATE SOMETHING (Self-employed)

Nov 2013 – Present

Kennedale, TX

- Built 100+ custom websites and API integrations for businesses across industries over 12 years

- Developed AI agent infrastructure including task management system (Beads) and autonomous orchestration framework (Harness)
- Created automation solutions: certificate delivery systems, multi-platform event sync (Webflow/Eventbrite/Zoom/MailChimp), QuickBooks time-tracking integration
- Established design system philosophy (Subtractive Triad) applied across all client and internal projects

**On-Screen Educator** — *Webflow*

Mar 2020 – Apr 2021

Hybrid

- Created video tutorials and live streams teaching web design, interactions, e-commerce, and CMS to global user base
- Contributed to development and launch of Webflow University 2.0, comprehensive learning platform for web design education
- Collaborated with product team on curriculum development aligned with feature releases and user needs

**Customer Support Specialist & Team Manager** — *Webflow*

Feb 2018 – Mar 2020

Greater St. Louis Area (Remote)

- Led team of Customer Support Specialists, setting performance goals and ensuring consistent service quality
- Developed comprehensive onboarding program using custom LMS built with Knack and Webflow
- Diagnosed and resolved technical issues, collaborating with engineering team on complex problems
- Contributed to Webflow's help documentation, ensuring accurate and comprehensive content

**EDUCATION & CERTIFICATIONS**

---

**Texas A&M University** — B.S. Animal Sciences (2008–2010)**Certifications:** UI/UX Design (Boulder Digital Arts) | Web Design (UTA, Arlington TX)**SELECTED PROJECTS**

---

- **Beads:** Agent-native task management system with cross-session memory, PageRank-based prioritization, and Git-synced persistence for AI agent workflows
- **Harness:** Autonomous agent orchestration framework with checkpoint-based human oversight, failure recovery, and parallel execution (swarm mode)
- **CREATE SOMETHING Platform:** Multi-property web architecture (.io, .space, .agency, .ltd) on Cloudflare with shared component library and design canon
