

Template Submission Checklist

Overview

Get your template to the Marketplace faster by ensuring that all items in the checklist below have been addressed before submitting.

Only templates that comply with our submission guidelines and quality criteria will be considered for publishing.

If you haven't familiarized yourself with all requirements, make sure to read through these resources before submitting your template.

[Submissions guidelines](#)

[Quality criteria](#)

Submission checklist

TLDR: Go through your template and check off the following items before submitting it to the Marketplace Team for review.

Info + Documentation:

- ☐ Read the "Description (short)" to ensure it does not contain any errors.
- ☐ Read the "Description (long)" to ensure it does not contain any errors.
- ☐ Licensing and Changelog (when added) pages should have the following custom head code: `<meta name="robots" content="noindex">`

- ☐ A link to “Licenses” page in footer
- ☐ SEO title set on the home page - {{Template-name}} - Webflow HTML website template or {{Template-name}} - Webflow Ecommerce website template for Ecommerce templates

Design + Usability

- ☐ No layout bugs in Desktop breakpoint
- ☐ No layout bugs in Tablet breakpoint
- ☐ No layout bugs in Mobile portrait or landscape breakpoints
- ☐ Classes names that make sense (Bad: heading1, div3. Good: Main Heading)
- ☐ All dynamic pages should have content - no blank pages
- ☐ Verify spelling and grammar for headings and placeholder text, if not using Lorem Ipsum. Headings (outside of Rich Text) should be descriptive and not use Lorem Ipsum.
- ☐ If Multi Layout, must have a minimum of 3 unique layouts for at least 3 static pages. (You can find an example of a multi layout template on our [quality criteria](#) page.)

Performance + Functionality

- ☐ No Legacy interactions. Use only Interactions 2.0
- ☐ If Ecommerce, cart should contain standard elements (items, subtotal, checkout buttons) and be functional. It should also be styled the same as the rest of the template.
- ☐ If Ecommerce, product template page should include: Add to Cart element, Product description, Product image (image only required for tangible products, e.g. not required for software)

Code/Technical

- ☐ No page-level custom code except for Antialiasing property and meta robots for Changelog and Licensing pages.
- ☐ No site-level custom-code except for font smoothing. Example:
{-webkit-font-smoothing: antialiased; -moz-osx-font-smoothing: grayscale;}
- ☐ If Ecommerce, the following steps should remain unchecked: Add a business address, Add a shipping method, Review tax settings, Add payment provider, Add hosting, Enable checkout
- ☐ Favicon added and displaying properly

Safety/Legal

- ☐ No trademarked logos, branded content or premium stock assets - use fake logos or brands and use CC0 libraries instead
- ☐ License page - Add this exact text to the top: "All graphical assets in this template are licensed for personal and commercial use. If you'd like to use a specific asset, please check the license below."
