WEBFLOW

System Architect

Dec 2024 – Present

Marketplace Team

- Build the systems that power our template and app marketplace
- Created our App Submission Form—handles retries automatically, catches duplicates, tracks every submission from upload to Airtable
- Created the Webflow Way Validator, a Designer Extension that checks templates against best practices. Used Rust for the heavy lifting—runs 3x faster on large projects

Marketplace Operations Manager

Jul 2023 – Dec 2024

Marketplace Team

- Built the Webflow Dashboard creators use daily—asset management, version history, analytics. Migrated it from Vercel to Cloudflare for better performance
- Contributed to the Airtable integration that connects the dashboard to marketplace data

On-Screen Educator

Mar 2020 – Apr 2021

Education Team

- Helped launch Webflow University 2.0
- Created tutorials for everyone from first-time users to developers building integrations
- Learned how to explain complex things simply—a skill I use every day

Customer Support Specialist & Team Manager

Feb 2018 – Mar 2020

Support Team

- Helped 500+ customers get unstuck—technical problems, implementation questions, "how do I do this?"
- Led a team of support specialists
- Built an LMS to onboard new teammates. We used it to scale support to APAC
- Built the first version of our template submission system. That project brought me back to Webflow twice

SIDE PROJECTS

2023 – Present

Founder

[CREATE SOMETHING](#) · [WORKWAY](#)

- Building an AI workflow platform. Learning what works and what doesn't with LLMs in production
- Full-stack: React, TypeScript, Cloudflare

SKILLS

Frontend: React, SvelteKit, Next.js, TypeScript

Infrastructure: Cloudflare, Vercel, Postgres

Webflow: Designer API, Apps, CMS, Integrations

Performance: Rust/WASM when it matters

AI: LLMs in production, not just demos

People: I've worked with customers at every stage

EDUCATION

Texas A&M University

Bachelor's Degree

UI/UX Design Certification

Boulder Digital Arts
