

Micah Johnson

Frontend engineer. Angular roots, TypeScript daily, AI tools fluent.

Kennedale, TX · micah@createsomething.io · LinkedIn · createsomething.io

I'm applying for the Software Engineer - Front-End Web Development role.

You're looking for someone fluent in TypeScript, JavaScript, and Angular who uses AI tools throughout the development lifecycle. I started with Angular at Maritz building event sites for enterprise clients. I've since worked extensively in React and SvelteKit, but the fundamentals are the same: component architecture, state management, reactive patterns. Modern Angular is TypeScript-based—and TypeScript is my primary language.

I use AI coding assistants daily. Claude Code, GitHub Copilot, MCPs—these aren't novelties for me, they're how I work. I'm building an AI workflow platform on the side, so I understand both how to use these tools and how they work under the hood.

At Webflow, I've built production applications end-to-end. The Dashboard is a full web application with reusable components, state management, and REST APIs. The Validator is a Designer Extension I built from scratch—TypeScript frontend with Rust/WASM for performance. I write clean, maintainable code, use Git for version control, and contribute to Agile ceremonies. I've worked with Playwright for testing and Vite for builds.

Before Webflow, I led the web team at Hunter Engineering, managing public sites and UI/UX for an industrial manufacturing company. I understand enterprise environments and the care required when building software that professionals depend on.

I'm a Texas A&M alum, legally authorized to work in the US, and excited about the opportunity to build a next-generation IDE for FactoryTalk Batch. I learn domains fast—I've moved from enterprise events to web design platforms to AI tooling. Manufacturing automation is next.

— Micah Johnson

WEBFLOW

System Architect

Dec 2024 – Present

Marketplace Team

- Build and maintain scalable web applications using TypeScript, JavaScript, and modern frameworks
- Webflow Way Validator: TypeScript frontend, reusable components, Playwright testing
- App Submission Form: REST APIs, PostgreSQL, complete user flows with state management

Marketplace Operations Manager

Jul 2023 – Dec 2024

Marketplace Team

- Dashboard: SvelteKit (component architecture like Angular), Vite builds, REST APIs
- Collaborated with UX and product to deliver high-quality features

On-Screen Educator

Mar 2020 – Apr 2021

Education Team

- Helped launch Webflow University 2.0
- Created technical documentation and tutorials for developers

Customer Support Specialist & Team Manager

Feb 2018 – Mar 2020

Support Team

- Helped 500+ customers with technical issues
- Led team, collaborated across QA, product, and engineering

EARLIER EXPERIENCE

UI Designer & Web Manager · Hunter Engineering (Nov 2016 – Feb 2018)

Led web team for industrial manufacturing company, managed public sites and UI/UX

Interactive Developer · Maritz (Aug 2015 – Nov 2016)

Built Angular event sites for enterprise clients, microsites, custom web applications

SIDE PROJECTS

Founder

2023 – Present

CREATE SOMETHING · WORKWAY

- AI workflow platform—daily user of AI coding assistants (Claude Code, MCPs)
- TypeScript, React, modern web tooling

SKILLS

Languages: TypeScript, JavaScript, Rust, Python

Frameworks: Angular, React, SvelteKit, Next.js

APIs: REST, GraphQL, JSON

Testing: Playwright, Vitest, component testing

Tools: Git, Vite, CI/CD, Jira, Agile

AI: Claude Code, GitHub Copilot, MCPs

EDUCATION

Texas A&M University

Bachelor's Degree

UI/UX Design Certification

Boulder Digital Arts
