

Micah Johnson

Full-stack engineer. I ship fast and own outcomes.

Kennedale, TX · micah@createsomething.io · LinkedIn · createsomething.io

I'm applying for the Full Stack Software Engineer II role.

I've been a Morning Brew reader for years. The newsletter does what good content should do—it respects your time and makes you smarter. I inspected morningbrew.com before applying—Next.js, solid Lighthouse scores (92% performance, 96% best practices), though I noticed about 20 React hydration errors (#418) in the console. SSR/CSR mismatches are tricky; I've debugged similar issues in my own Next.js work. The site is well-built, and I'd love to help make it even better.

Your stack is my stack. Next.js, React, TypeScript—that's what I use every day. Postgres, Vercel, Cloudflare—I've built production systems on all three. At Webflow, I built a Dashboard (SvelteKit, similar React patterns) that creators use daily, an App Submission Form (Next.js, PostgreSQL) with complete user flows, and a Validator that checks templates against best practices.

You want someone with a high level of ownership who ships quickly. That's how I work. When the Marketplace team needed a submission system, I didn't wait for specs—I built it. When Support needed an LMS, I built it. When templates needed validation, I built a Designer Extension from scratch. I see problems, I propose solutions, I ship.

I also understand the content side. I spent a year as an On-Screen Educator at Webflow, creating tutorials and curriculum. I know what it takes to make content that resonates—and I know how engineering can make that content easier to create, distribute, and consume.

I don't have Go experience, but I've shipped Rust to production and I pick up languages when the work requires it. Python is what I use for AI work on the side.

Morning Brew built trust by respecting its audience. I'd love to help build the tools that keep that trust going.

P.S. Dan Toomey is my hero.

— Micah Johnson

WEBFLOW

System Architect

Dec 2024 – Present

Marketplace Team

— Build internal tools and consumer-facing web applications

— App Submission Form: Next.js, TypeScript, PostgreSQL, REST APIs

— Webflow Way Validator: TypeScript, React patterns, Rust/WASM for performance

Marketplace Operations Manager

Jul 2023 – Dec 2024

Marketplace Team

— Dashboard: SvelteKit (React-like), PostgreSQL, Cloudflare (D1, KV, R2)

— Shipped fast, iterated based on user feedback

On-Screen Educator

Mar 2020 – Apr 2021

Education Team

— Helped launch Webflow University 2.0—content that serves millions

— Understand the content creation side of media products

Customer Support Specialist & Team Manager

Feb 2018 – Mar 2020

Support Team

— Helped 500+ customers—learned to solve problems with stakeholders

— Led a team, set practices, shipped improvements

SIDE PROJECTS

Founder

2023 – Present

CREATE SOMETHING · WORKWAY

— AI workflow platform—React, TypeScript, Python

— Ship fast, learn what works in production

SKILLS

Frontend: React, Next.js, TypeScript, SvelteKit

Backend: Node.js, PostgreSQL, REST & GraphQL APIs

Infrastructure: Vercel, Cloudflare, AWS, Heroku

Languages: TypeScript, JavaScript, Python, Rust

Process: Ship fast, iterate, own outcomes

Content: Education, curriculum, user experience

EDUCATION

Texas A&M University

Bachelor's Degree

UI/UX Design Certification

Boulder Digital Arts
