

Micah Johnson

Senior frontend engineer. I own outcomes, not just code.

Kennedale, TX · micah@createsomething.io · LinkedIn · createsomething.io

I'm applying for the Senior Software Engineer role.

You're building an MVP with a small team, and you need someone who can ship fast, own outcomes, and thrive in ambiguity. That's how I've spent the last five years at Webflow—and how I'm building my own AI platform now.

I've built production web applications end-to-end. The Webflow Dashboard is a full React/SvelteKit application with reusable UI components, state management, and real users depending on it daily. The Webflow Way Validator is a Designer Extension I built from scratch—TypeScript frontend, Rust/WASM for performance, accessibility validation built in. These aren't features I contributed to. I designed and built them.

Your values resonate: "Extreme Ownership—we never say 'that's not my job.'" At Webflow, when the Marketplace team needed a submission system, I built it. When Support needed an LMS, I built it. When templates needed validation, I built the Validator. I don't wait for permission. I see what needs to happen and make it happen.

I also have the design sensibility you're looking for. I have a UI/UX certification, I've worked closely with designers translating Figma to polished interfaces, and I care deeply about accessibility. Good UI isn't decoration—it's how humans interact with systems.

You're building AI systems that solve real-world problems. I'm doing the same thing—building an AI workflow platform, learning what works with agentic systems in production. I understand that AI isn't magic; it's infrastructure that needs to be reliable, observable, and human-friendly.

I'm motivated by hard problems and high impact. Soris sounds like both. I'd love to help build the infrastructure of the future.

— Micah Johnson

WEBFLOW

System Architect

Dec 2024 – Present

Marketplace Team

- Build and maintain scalable web applications end-to-end
- Webflow Way Validator: TypeScript, React patterns, Rust/WASM—accessibility and design system validation
- App Submission Form: React/Next.js, PostgreSQL, REST APIs, complete user flows

Marketplace Operations Manager

Jul 2023 – Dec 2024

Marketplace Team

- Dashboard: SvelteKit (React-like patterns), reusable UI components, state management
- Worked with designers to translate high-fidelity designs into polished interfaces

On-Screen Educator

Mar 2020 – Apr 2021

Education Team

- Helped launch Webflow University 2.0
- Created content focused on accessibility and user experience best practices

Customer Support Specialist & Team Manager

Feb 2018 – Mar 2020

Support Team

- Helped 500+ customers—learned what makes interfaces human-friendly
- Led a team, owned outcomes beyond my role

SIDE PROJECTS

Founder

2023 – Present

CREATE SOMETHING · WORKWAY

- AI workflow platform—React, TypeScript, agentic systems
- Building AI infrastructure that's reliable and human-friendly

SKILLS

Languages: TypeScript, JavaScript, Rust, Python

Frontend: React, SvelteKit, Next.js, Vite

APIs: REST, some GraphQL

Testing: Vitest, Playwright, component testing

Design: Figma, UI/UX, accessibility (WCAG)

AI: Agentic systems, LLM orchestration

EDUCATION

Texas A&M University

Bachelor's Degree

UI/UX Design Certification

Boulder Digital Arts
