

Micah Johnson

API Governance & Platform Strategy Leader

Kennedale, TX (open to hybrid)

micah@createsomething.io

linkedin.com/in/micahryanjohnson

createsomething.io

API governance-focused architect with 12+ years building and scaling API-driven systems. I define standards, enforce lifecycle controls, and align architecture, security, and platform teams around consistent delivery. Experienced in OpenAPI-first design, REST and GraphQL governance patterns, and policy-aware automation in CI/CD. Known for translating technical policy into practical workflows teams actually adopt.

EXPERIENCE

Founder · CREATE SOMETHING / WORKWAY

Apr 2025 – Present

Automation infrastructure · API architecture · Policy-aware delivery

- **Defined API and interface standards** across tool ecosystems, including contract shape, naming conventions, and versioning expectations.
- **Built governance mechanisms into delivery pipelines** using reusable checks and policy artifacts to improve consistency and reduce integration defects.
- **Led cross-functional implementation patterns** connecting product, engineering, and operations teams around shared integration rules.
- **Documented reference workflows and playbooks** to accelerate onboarding and improve long-term maintainability of API-enabled systems.

System Architect · Webflow

Dec 2024 – Present

Marketplace architecture · Data and integration governance

- **Architected internal systems with clear interface contracts** for marketplace operations and cross-team integrations.
- **Introduced repeatable standards for platform workflows** to improve reliability, observability, and operational consistency.
- **Partnered with technical and business stakeholders** to align delivery decisions with risk, scale, and supportability requirements.

Marketplace Operations Manager · Webflow

Jul 2023 – Dec 2024

- **Operationalized governance for submission and publishing workflows** with structured review gates and quality controls.
- **Built dashboards and process instrumentation** enabling leadership to track compliance, throughput, and service quality KPIs.
- **Reduced process variance** through standards documentation and cross-team rollout of shared operating procedures.

Customer Support Specialist & Team Manager · Webflow

Feb 2018 – Mar 2020

Support operations · Process governance · Team leadership

- **Led support teams and standardized operating procedures** across a high-volume technical support environment.
- **Built internal systems and onboarding frameworks** that improved consistency in execution across global teams.
- **Drove cross-functional incident and escalation practices** with engineering and product partners.

Webflow & API Developer · Create Something

Nov 2013 – Present

- **12+ years of API-centric solution delivery** across REST integrations, workflow automation, and platform architecture.
- **Built client and internal systems** that required strong contract discipline, stakeholder alignment, and long-term supportability.

CORE STRENGTHS

API Governance

Design standards, lifecycle policy, versioning strategy, review gates, reference playbooks

Security & Risk Alignment

OAuth2/JWT patterns, IAM collaboration, control validation support, audit-ready documentation

Platform & Delivery

Policy checks in CI/CD, TypeScript/JavaScript, Cloudflare, GitHub, data instrumentation

API Architecture

REST, OpenAPI, GraphQL, integration contracts, API product thinking

Governance Operations

Stakeholder forums, policy rollout, KPI design, continuous improvement programs

Leadership

Cross-functional influence, technical communication, enablement, change management

EDUCATION

Bachelor's Degree · Texas A&M University

UI/UX Certification · Boulder Digital Arts
