Wiz Hiring Team

Senior Support Systems Engineer

Hello,

I've been the support manager waiting for the tools you're building. I know exactly what breaks, what slows teams down, and what leadership actually needs to see in dashboards—because I've lived it.

At Webflow, I spent two years leading the support team. I saw firsthand what happens when ticket routing is manual, when visibility into backlog is a spreadsheet, and when support managers have to beg engineering for the tools they need. So I started building them myself—LMS systems for onboarding, dashboards for performance tracking, integrations to connect our support stack.

That experience shaped everything I've done since. **I'm not a tools engineer guessing what support teams want. I'm a former support leader who became an engineer because I got tired of waiting for better tools.**

Support operations from the inside

Two years as Support Team Manager at Webflow—hiring, performance management, process optimization.

Built internal support applications

Created onboarding LMS, ticket workflow systems, and performance dashboards at Webflow.

AI-powered workflow expertise

47 documented AI experiments. Currently building WORKWAY with intelligent routing that analyzes, tags, and routes work.

Snowflake and data infrastructure

Working with Snowflake, Census, Amplitude, and Segment at Webflow for operational visibility.

Python + web frameworks

TypeScript/JavaScript (12+ years), Python for automation. REST APIs, GitHub, technical documentation.

The job description mentions building "AI-powered workflows to agentially analyze, tag, and route incoming support tickets." That's almost word-for-word what I'm building at WORKWAY. I'd welcome the chance to discuss how my experience—both as a support leader and as a systems engineer—could contribute to Wiz's support operations excellence.

Looking forward to the conversation,

Micah Johnson

Micah Johnson

Support Systems Engineer · Tools Development · AI-Powered Workflows

Kennedale, TX [linkedin.com/in/micahryanjohnson](#) [createsomething.io](#)

I've been the support manager waiting for better tools. Led a support team at Webflow, built internal systems to improve operations, and now architect data infrastructure. I understand what support teams actually need—because I've lived it.

EXPERIENCE

Founder · WORKWAY Apr 2025 – Present

Automation infrastructure · AI-powered workflows

- **Building AI-powered workflow automation** platform for routing and managing tasks
- **Developed intelligent routing systems** that analyze, tag, and route work to appropriate teams

System Architect · Webflow Dec 2024 – Present

Marketplace Team · Snowflake, Census, Amplitude, Segment

- **Architect internal tools and dashboards** giving managers visibility into team performance
- **Build data pipelines** using Snowflake, Census, Amplitude for operational insights

Marketplace Operations Manager · Webflow Jul 2023 – Dec 2024

- **Built internal applications** to improve efficiency of operations organization
- **Developed dashboards** for managers to track case backlog and team performance

Customer Support Specialist & Team Manager · Webflow Feb 2018 – Mar 2020

Support Operations · Tools Development · Team Leadership

- **Led global support team**—hiring, performance management, service quality
- **Built internal support tools** including LMS and onboarding systems
- **Created ticket management workflows** to optimize routing and resolution times
- **Developed technical documentation** for support processes and knowledge base

On-Screen Educator · Webflow Mar 2020 – Apr 2021

- **Created comprehensive documentation** for Webflow University platform

Co-Founder, Technology · Half Dozen Jul 2024 – Present

- **Built automation workflows** for operations and case management

Webflow & API Developer · Create Something Nov 2013 – Present

- **12+ years building applications** with REST APIs and integrations
- **47 documented AI/ML experiments** including prompt engineering and workflow automation

TECHNICAL SKILLS

Languages

JavaScript/TypeScript (12+ yrs), Python, SQL

AI/ML Integration

Prompt engineering, LLM APIs, AI-powered workflows

Infrastructure

GitHub, Cloudflare Workers, AWS, Vercel

Data & Analytics

Snowflake, Census, Amplitude, Segment, BigQuery

Web Frameworks

React, Next.js, Node.js, REST APIs, GraphQL

Support Platforms

Zendesk patterns, ticket routing, SaaS admin

EDUCATION

Bachelor's Degree · Texas A&M University

UI/UX Certification · Boulder Digital Arts
