

Micah Johnson

Full-stack engineer. Five years building products that help people.

Kennedale, TX · micah@createsomething.io · LinkedIn · createsomething.io

I'm applying for the Software Engineer II, Fullstack role.

I've spent five years at Webflow building full-stack systems and partnering with product teams. That's exactly what this role asks for—and I'm drawn to Included Health because the stakes are higher. You're not building websites; you're building healthcare access.

At Webflow, I built the systems that power our marketplace. The App Submission Form (Next.js, PostgreSQL) handles retries automatically, catches duplicates, and tracks every submission end-to-end. The Dashboard (SvelteKit, React patterns) gives creators asset management, version history, and analytics. The Validator checks templates against best practices—I wrote the performance-critical parts in Rust because JavaScript was too slow.

These systems span frontend, API, and backend. They need to be fast, reliable, and accessible. When something breaks, I fix it and invest in making sure it doesn't break the same way again. That's the job.

Before I built systems, I worked directly with customers. I started in support—500+ people helped. I led a team. I moved to Education and helped launch Webflow University 2.0. I learned how to partner with product and design to shape experiences that actually work for users.

I don't have Go experience, but I've shipped Rust to production. I pick up languages when the work requires it. React, TypeScript, PostgreSQL, REST APIs, Docker, AWS—that's my daily stack.

I'm a Texas A&M alum, based in Texas, and comfortable with remote work. I'd love to help Included Health raise the standard of healthcare for everyone.

— Micah Johnson

WEBFLOW

System Architect

Dec 2024 – Present

Marketplace Team

- Build full-stack systems for template and app marketplace
- App Submission Form (Next.js, PostgreSQL): REST API with automatic retries, duplicate detection, end-to-end tracking
- Webflow Way Validator: TypeScript + Rust/WASM, validates design system, SEO, accessibility

Marketplace Operations Manager

Jul 2023 – Dec 2024

Marketplace Team

- Dashboard (SvelteKit, Cloudflare): asset management, version history, analytics
- Migrated from Vercel to Cloudflare for better performance and reliability

On-Screen Educator

Mar 2020 – Apr 2021

Education Team

- Helped launch Webflow University 2.0
- Created tutorials for beginners through developers—learned to design for different user needs

Customer Support Specialist & Team Manager

Feb 2018 – Mar 2020

Support Team

- Helped 500+ customers with technical problems and implementation
- Led a team of support specialists

SIDE PROJECTS

Founder

2023 – Present

CREATE SOMETHING · WORKWAY

- AI workflow platform—React, TypeScript, Cloudflare Workers
- Learning what works with LLMs in production

SKILLS

Frontend: React, SvelteKit, Next.js, TypeScript

Backend: Node.js, PostgreSQL, REST APIs

Infrastructure: Docker, AWS, Cloudflare, Vercel

Systems: Rust/WASM for performance

Process: Partner with product and design

People: Customer-facing, team leadership

EDUCATION

Texas A&M University

Bachelor's Degree

UI/UX Design Certification

Boulder Digital Arts
