

Micah Johnson

AI Engineer — Multi-Step Agentic Systems, LLM Orchestration, Production Deployment

Kennedale, TX · micah@createsomething.xyz · LinkedIn · createsomething.io

EXPERIENCE

Founder — Agentic AI Platform

2023 – Present

CREATE SOMETHING · WORKWAY

- Building WORKWAY—agentic workflow platform with progressive autonomy and human-in-the-loop controls
- Multi-step agentic orchestration: Harness (sequential), Gastown (parallel), Ralph (iterative) patterns
- State management across AI workflows with rollback and audit capabilities
- RAG pipelines for constraint-aware reasoning over documentation and policy
- Tool calling, function execution, and structured task generation from LLM outputs
- 155 scripts reduced to 13 through systematic agentic automation methodology
- Production deployment: CI/CD pipelines, Docker containers, edge infrastructure

System Architect

2021 – Present

Webflow · Marketplace Team

- Architect systems transforming operational data into structured workflows and plans
- Build orchestration layers across tools, services, and approval workflows
- Design permissioning and trust mechanisms for progressive feature access
- Instrument systems for auditability and traceability across distributed services

On-Screen Educator

2020 – 2021

Webflow · Education Team

- Helped launch Webflow University 2.0—translating complex systems for diverse audiences
- Created explainable, transparent documentation linking outputs to source inputs

Customer Support Specialist & Team Manager

2018 – 2020

Webflow · Support Team

- 500+ direct user engagements—deep understanding of trust-building and user behavior
- Led team with progressive responsibility model (earned delegation in practice)
- Built systems that adapted based on user experience and operational context

TECHNICAL SKILLS

Agentic AI: Multi-step orchestration, state management, tool calling, human-in-the-loop

Languages: Python, TypeScript, JavaScript, SQL

Data: PostgreSQL, vector databases, OpenSearch, caching patterns

LLM Systems: RAG pipelines, function calling, constraint-aware reasoning, explainability

Infrastructure: Docker, CI/CD pipelines, edge deployment, monitoring

Operations: Auditability, traceability, latency optimization, cost management

EDUCATION

Texas A&M University

Bachelor's Degree

UI/UX Design Certification

Boulder Digital Arts
